

Project Design Phase

Proposed Solution Template

Date	19 July 2026
Team ID	
Project Name	STOCK TRADING APP
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Retail investors and learners face difficulties in tracking real-time stock prices, managing virtual portfolios, and analyzing performance in one place. Existing platforms are complex, expensive, or not beginner friendly.
2.	Idea / Solution description	SB Stocks is a paper trading web application that allows users to buy and sell US stocks using virtual money. It provides real-time market data, portfolio management, watchlists, transaction history, and performance analytics in a simple and user-friendly interface.
3.	Novelty / Uniqueness	Combines real-time stock data, virtual trading, and portfolio analytics in a single platform. Designed specifically for learners and investors to practice trading risk-free with an intuitive and easy-to-use UI.
4.	Social Impact / Customer Satisfaction	Helps students and novice investors learn stock trading without financial risk. Improves financial literacy and decision-making skills. User feedback drives continuous improvement for better experience and satisfaction.
5.	Business Model (Revenue Model)	Freemium model – Free access to basic features. Premium subscriptions for advanced analytics, real-time alerts, and exclusive features.
6.	Scalability of the Solution	Built with MERN stack and modular architecture to support more users and additional features. Can be scaled using cloud services (AWS / Render) and optimized databases for high performance.
