

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	19 July 2026
Team ID	
Project Name	SB Stocks (Stock Trading App)
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Stock Management	View list of all available stocks View stock details (price, change, chart) Search and filter stocks
FR-4	Trading	Buy stocks using virtual balance Sell owned stocks Reduce stock quantity after purchase Save orders and transactions
FR-5	Portfolio Management	View portfolio holdings Track total portfolio value & gain/loss
FR-6	Transaction History	View all buy/sell transactions Filter transactions by date
FR-7	Watchlist	Add/remove stocks to watchlist View watchlist with live prices
FR-8	User Profile	View and update profile information Change password
FR-9	Authentication	User Login Logout / Session management
FR-10	Dashboard	View wallet balance View portfolio summary & performance

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	User-friendly and responsive UI for seamless user experience across devices.
NFR-2	Security	Secure authentication using JWT, password hashing, input validation and protection against common attacks.
NFR-3	Reliability	Accurate data handling, proper error handling and consistent application behavior.
NFR-4	Performance	Fast API responses, optimized database queries and efficient state management.
NFR-5	Availability	Application hosted on cloud with high uptime and regular backups.
NFR-6	Scalability	Modular architecture and API based design to handle growth in users and data.
